Profile

My name is Manoil and I'm 24 years old. You can just call me Mano

I'm currently studying Visual Communication Design at VIA C, where I'm about to write my bachelor thesis. I'm graduating this winter, and it that regards I'm looking for my first job to start up my creative career.

What I'll be able to offer you, is a creative soul that likes to think outside the box and who is capable of working in between the fine lines, spanning to the more complex visuals.

I've been a freelance photographer since 2015, and I do have experience in this mediavisual field in terms of photos and video, where I've specialized myself in content creation as a multimediadesigner.

Besides that, I'm a true adventurer that's curious to explore the unknown.
